a. Data for the period 1960-73 refer to old fiscal year beginning October 1. From 1974 they refer to the new fiscal year beginning April 1. b. GDP at market prices. c. Includes government consumption. d. Prices prevailing in 1970 are generally taken as the base price, except for two agricultural products for which 1971 prices are used rather than 1970 prices because of abnormal price movements in that year. This explains the difference between the GDP and its components for the year 1970 in current and constant prices.
