Note: Figures in italics are for years other than those specified.

a. Purchasing power parity; see the Technical Notes. b. Calculated using the World Bank Atlas method. c. Estimated to be low income (\$755 or less). d. Estimated to be upper middle income (\$2,996-9,265). e. Estimated to be high income (\$9,266 or more). f. The estimate is based on regression; others are extrapolated from the latest International Comparison Programme benchmark estimates. g. Estimated to be lower middle income (\$756-2,995).
