World Development Report 2005
A Better Investment Climate—For
Everyone

Overview

A better investment climate—for everyone

This draft has been prepared by a core team led by Warrick Smith and comprising Mary Hallward-Driemeier, Gaiv Tata, George Clarke, Raj Desai, Timothy Irwin, Richard Messick, Stefano Scarpetta and Ekaterina Vostroknutova. Leora Klapper acted as the team's finance expert. The team was assisted by Yann Chen, Alexandru Cojocaru, Zenaida Hernandez, Tewodaj Mengistu, Claudio Montenegro and David Stewart. Colleagues across the Bank Group helped the team in many ways.

The work was initiated under the direction of Nicholas Stern and carried out under the direction of François Bourguignon. The published version will be available in September 2004.

Overview A better investment climate—for everyone

How investment climates vary
Why the investment climate matters
Challenges to investment climate improvement
Making progress
Focusing on the basics
Going beyond the basics?
How the international community can help

List of Figures

- 1 The level and composition of cost burdens vary widely across countries
- 2 Policy uncertainty dominates the investment climate concerns of firms
- 3 Concerns about government-related risks vary widely across countries
- 4 Competitive pressure reported as significant for almost 90 percent of surveyed firms in Poland—but only 40 percent in Georgia
- 5 Investment climate conditions vary within countries
- 6 Informal and small firms are often hit hardest by investment climate constraints
- 7 Domestic private investment dominates foreign direct investment
- 8 Reducing government-related risks increases the probability of new investment
- 9 Productivity accounts for most of the difference in output per worker
- 10 Stronger competitive pressure increases the incentives to innovate
- 11 Growth is closely associated with poverty reduction
- 12 How 60,000 poor people rated jobs and self-employment as pathways out of poverty
- 13 Constraints expressed by firms—Bulgaria vs. Ukraine
- 14 Share of firms that do not believe the courts will uphold their property rights
- 15 Number of days to register a new business—from 11 days in Latvia to 203 in Haiti
- 16 Many firms rate finance and infrastructure as a "major" or "severe" constraint
- 17 Firms often rate skill shortage and labor regulations as "major" or "severe" constraints
- 18 Manufacturing value added in a single country can far exceed net global official development finance
